Ciclotte Teckell

Ciclotte Teckell, the stunning stationary bicycle, the first-ever made with exquisite, transparent crystal.

The Ciclotte Teckell stationary bike came into being thanks to the two Italian companies behind its name. Both are leaders in their respective industries and united by their love of technology and attention to details. Ciclotte's motto "Ride on design" meets Teckell's "Italian design looks forward" in the realization of an object that's a pure expression of contemporary life.

Shapes and surfaces simplify themselves: design becomes minimal, pure.
The transparency connects the 2 structural parts of the bike like an invisible bridge. The result is a revolution in the design of fitness equipment and confirm the specialness of Ciclotte products.

The Ciclotte Teckell is an elegant object able to dialogue with any other piece of furniture in rooms where living, work and exercise share the same space: a sculpture that does not exclude function, guaranteeing optimum performance thanks to the sophisticated mechanics and ergonomics applied to this modern stationary bike.

Ciclotte Teckell is truly an elegant furnishing accessory with its minimal, pure design. The transparent crystal blends harmoniously with the structural elements made of high-tech materials and sophisticated mechanisms. This streamlined design object is also, for all intents and purposes, an exercise bike. Extensive ergonomic research was conducted prior to manufacturing the bike. It also sports a gear box capable of simulating a road feel to allow for a more intense training experience. Furthermore, Ciclotte Teckell is a Bluetooth-enabled smart exercise bike, permitting a fully immersive training session. Another entry to the list of those must-have Italian luxury items

Designed by hand yet loaded with high-tech elements, this stationary bicycle is a stylish ride with a distinct personality. Ciclotte Teckell cruises onto the design scene as a unique furnishing accessory that unites exceptional performance with a high aesthetic value.
